PROJECTS

Personal Website
adinjura.com
- → Serves as a place to host my resume, and post simple blog posts about various topics
- → Developed using the Hugo framework and hosted with NGINX. Hosted on an Oracle Cloud VPS with services deployed on docker. Traffic funneled through cloudflare for security

Home Lab
- → Dell Inspiron 3847 running on Rocky 8. Hosts various game servers in docker. Tailscale used for remote access
- → Windows VM's for malware analysis & kernel debugging
- → Google Cloud E2-Micro instance running a cowrie honeypot
- → Raspbery PI running AdGuard for DNS adblocking
- → Cisco Catalyst 3750 performing routing and switching for my devices

YouTube
@tappineapple3381
- → I have a YouTube channel where I teach basic reverse engineering and show off some of my projects
